Subject: RE: Superfund and Brownfield Sites and Infrastructure

I've said to the CAG that the site is not connected to I-70, it is merely adjacent. There is some I-70 incidental work that occurs within the boundaries. However, the Globeville Landing Outfall is stormwater infrastructure and that is squarely within the site.

All –

Does region 8 have any superfund sites that have any connections with infrastructure? See Shahid's note below.

Not sure if VB/I-70 would fit this request?

Thanks – Joy

Folks,

This message was just forwarded to me and is on a very short fuse. The Administrator is interested in visiting sites with connection to infrastructure as this will be a major State of the Union theme. Off top of my head I was thinking perhaps

Bunker Hill and Navajo Nation sites? This may be a chance for us to raise mining sites onto the Administrator's radar. I need this list of sites by 11:30 am eastern. Thanks!

Subject: Superfund and Brownfield Sites and Infrastructure

All

We have been asked to suggest before noon tomorrow some potential Superfund or Brownfield that the Acting Administrator might visit next month, where there is a connection to infrastructure as this will be a theme in the State of the Union. I would ask that you send me sites that come to your mind as potential candidates for visits. There is no need and no time to forward this request. I am interested in what comes to your mind.

For example, I think for Superfund sites it can be anything from a site that has been deleted to one that is in progress. Of course, many of the river sites are tied into infrastructure. I know that there is a major transit center at Woburn. Think of this as an addition opportunity to highlight the work the SF program does to make facilities ready for use, reuse, expanded use, etc. Maybe some of the Federal facilities have significant transportation facilities converted to civilian use.

Similar for Brownfields, it would be great to have some examples of projects that are either completed or underway that support infrastructure.

Please send me what comes to mind. I think the site name and location and a very short blurb about the site's status and connection to infrastructure.

Thank you for helping highlight the great work of your offices.

Peter
